

BACKFLOW TESTING FIRE SPRINKLER & LAWN IRRIGATION SYSTEMS

Your residence may have a fire sprinkler and/or lawn irrigation system which is equipped with a backflow prevention device. The backflow prevention device is installed on your water service or within your plumbing system as required by the Village of West Dundee's Cross Connection Control Program Ordinance, which is in conformance with Illinois Environmental Protection Agency regulations and the Illinois Plumbing Code, Section 890.1130.

A successful test of the device(s) must be completed at least once a year, and each time the device(s) becomes disconnected and reconnected to the municipal water system, by a State of Illinois licensed plumber who is certified as a Cross Connection Control Device Inspector (CCCDI). The CCCDI is required to test the device(s) and submit the test results each time the device(s) are tested on an approved test form to the Village of West Dundee's Department of Public Works.

You will receive a letter from the Department of Public Works notifying you that the annual testing of the backflow prevention device(s) at your residence is due. The notice will provide information on how to proceed with testing and/or options available to you regarding the testing of your backflow prevention device(s).

The Cross Connection Control Program protects you, your water system and the potential of contamination to the public water supply. Please contact the West Dundee Public Works Department to notify them of any cross connections that may not be monitored under this mandated program. The water **NOT** protected by these devices may be the water you are consuming.

We sincerely appreciate your cooperation with the annual testing of this device and will be happy to answer any additional questions you may have. You may call the West Dundee Department of Public Works during regular business hours, 7:30 a.m. - 4:00 p.m., Monday through Friday, at (847) 551-3815 or visit the Village's website at www.wdundee.org and click on Village Code online to view information on the Village's Cross Connection Control Regulations.
